Stone Mason

Series

## STONE MASON SERIES FEATURES

- STONE MASON SERIES from AMCON combines the timeless appearance and weathered texture of authentic hand hewn weathered natural stone with the strength and economy of concrete masonry.
- Choose from a random pattern running bond 4 piece veneer system with 2 return corner lengths or an 8" structural unit and return corner piece.
- Select from over 40 colors or create your own signature blend.
- Available in the new Eco-Friendly Sustainable Solutions mix design.
- The STONE MASON SERIES closely simulates natural stone sizes, but STONE MASON is actually modular and compatible with conventional wall construction methods.
- AMCON Enviro-Trol Curing ensures a completely hydrated, fully cured "pre-shrunk" unit. Enviro-Trol Curing provides units that are consistent in color and have greatly reduced efflorescence potential compared to conventionally cured units.
